

Harmondsworth Primary & its Learning

What is it?

its Learning is a Managed Learning Environment (MLE) which is an internet based system available anytime, anywhere and is designed to support teaching and learning. It is different from a website as it is not accessible to everyone and can only be accessed by a username and password. The MLE is very much like a virtual school containing different rooms. It enables children to access and share invaluable learning resources.

How does it work?

- Every child has been issued with a Unique **login** and **password**.
- Logging on to its Learning allows children access to 'virtual classrooms' personalised by their teachers.
- Children can share ideas with their classmates and teachers through forums.
- Work can be completed and handed in using a secure 'Hand in Folder' accessible only to the child and the teacher.

To access your child's classroom just simply login to the website below using your child's unique username/password.

Website:

A screenshot of the Harmondsworth Primary login page. At the top center is the school's logo. Below it, the text "Harmondsworth Primary" is displayed in a large font, with "Not from Harmondsworth Primary?" in a smaller blue font underneath. On the left, there is a login section titled "Log in with itslearning" containing two input fields: "Username" and "Password", and a green "Manual login" button. In the center, the word "OR" is written vertically. On the right, there is a grey box with a red border containing the text "A new window will appear if you are not already logged in" and a button that says "Log in with Atomwide USO". A red arrow points from the text "Click on this link to log in." to the "Log in with Atomwide USO" button.
